

# Flow2go™

## THE MOBILE SYSTEM FOR CHIPLESS OPERATIONS WITH FLOWDRILL AND FLOWTAP

Certified by German technical supervisory board.  
Ideally suitable for assembly and small batch series

### FULL FLEXIBILITY ON SITE AND IN THE WORKSHOP

The Flowdrill system „Flow2go“ was specifically developed for mobile use. It is designed for manufacturing threads M4 to M8 in materials of up to 2.5 mm thickness. The hand drill provides infinite electronic speed control, overload protection and reverse operation for tapping.

The robust drill base is made of die-cast aluminium. The guide is smooth and precise. With an optionally available modification plate the system can be used on welding tables.

#### The system

- is chipless, no waste
- creates threads in increased original material thickness
- creates threads with high pullout strength
- in steel, stainless steel, brass, aluminium, copper...
- for material thicknesses from 0.8 to 2.5mm
- for thread sizes M4 to M8

#### Advantages

- replaces rivet nuts, weld nuts and press nuts
- can be used in any place
- precise results
- mobile and space saving
- ideally suitable for installation works and small batch series
- saves cost in time and material

#### Typical applications

- maintenance
- handrail and staircase construction
- brazed and welded connections, push fittings
- threaded connections of all types

## Flow2go-basic

### includes:

- high precision drilling rig for extreme loads
- hand drill (1020 W / 2,600 rpm)
- vice (100x100mm clamping width)
- system case with comprehensive accessories

## system case

- Flowdrill + Flowtap for M6 + M8
- tool holder incl. collet Ø 6 + 8 mm
- thread forming oil (FTMZ)
- T-slot spanners
- assembly tools

## Flow2go-3D

### includes:

- modification plate for modular 3D welding tables
- high precision drilling rig for extreme loads
- hand drill (1020 W / 2,600 rpm)
- vice (100x100mm clamping width)
- system case with comprehensive accessories

**Certified by German technical supervisory board**

**Ideally suitable for assembly and small batch series**

Prices on request

## Supplementary equipment

(Optionally available):

- Flowdrill + Flowtap for M4 + M5
- collet for M4
- special lubricant for Flowdrill (FDKS)
- aluminium clamping jaws, extra high 45x100 mm
- modification plate for modular 3D welding tables
